

INTRODUCING RHEUMERA, PATIENT CARE DESIGNED FOR RHEUMATOLOGY.

Download and enroll in the app to help your Care Team monitor your care between office visits, document flares, track meds and more!

By engaging with Rheumera daily, your Care Team can provide better care for your Rheumatic disease.

Dedicated Access to Your Health Care Advocate

Rheumera expands your access to your care team, fostering active participation in your care journey through BYOD (Bring Your Own Data) capabilities. This approach ensures engagement from the moment of referral, offering a personalized experience that encourages meaningful conversations with your provider.

Personalized Care and Support

By tracking your symptoms and activities, Rheumera enables personalized care recommendations, allowing for a more tailored treatment plan. This active participation enhances your understanding and management of your condition, empowering you with the knowledge and tools needed for a healthier life.

Lifestyle Improvement Resources

Rheumera provides access to supportive lifestyle and behavior modification educational content, designed to complement your treatment plan. This resource aims to improve your overall well-being and quality of life by equipping you with practical advice and strategies for managing your condition more effectively.

Who Pays for Rheumera

Rheumera is insurance-funded and enables remote patient monitoring, offering cost-effective access to advanced rheumatologic care. It supports improved health outcomes through preventative strategies and optimizes newly available billing codes for rheumatologists, enhancing patient engagement and reducing healthcare costs

Note: Patients may have a copayment

USAGE: Answer just one question daily by text or app to ensure best results for your health journey.
